Oreoluwa Ogunneye

LAGOS, NIGERIA | 07032273009 | GIFTTEE2004@GMAIL.COM | LINKEDIN | GITHUB

Professional Summary

Backend Software Engineer with nearly 5 years of experience building scalable services using Node.js, TypeScript, NestJS, and cloud technologies. Skilled in backend architecture, API design, distributed data processing, database optimization, and production monitoring, with a focus on reliable, high-quality systems. Experienced in code reviews, mentoring, and cross-functional collaboration, with additional expertise in AWS, SQL, MongoDB, Java, and Python.

EXPERIENCE

Septa Software

Senior Software Engineer **Feb 2022 - Dec 2024**

- Architected and delivered high-performance backend services using Node.js and cloud computing practices, improving total system throughput and reliability by 35%. Implemented robust monitoring and alerting systems to support 99.9% uptime for production environments.
- Led code reviews and mentored junior developers while applying system design principles to improve incident response practices, resulting in a 25% reduction in production incidents. Leveraged AI-assisted tools to streamline development workflows and increase overall engineering team productivity by 20%.

Enyata

Software Engineer **Jun 2022 - Present**

- Developed dynamic user interfaces with React and optimized server-side logic using Nest.js to improve application scalability in distributed systems. These improvements led to a 20% increase in user engagement and a 15% boost in overall system processing efficiency.
- Managed complex data structures using SQL and MongoDB, focusing on query optimization to handle large datasets effectively. Database tuning resulted in a 30% increase in data processing speed and 25% faster retrieval times.

Software Engineer (Contract) **Jul 2022 - Nov 2022**

- Real-Time Data Engineering: Engineered a real-time data processing application using Node.js and TypeScript to manage high-frequency data streams efficiently. This implementation directly improved system response times by 30%, ensuring a seamless experience for over 10,000 concurrent users.
- Server-Side Logic Refinement: Utilized Nest.js to streamline server-side business logic and reduce unnecessary server load by 20% across distributed systems. I collaborated with cross-functional teams to deliver scalable web applications on time and 10% under the projected budget

Back End Developer Intern **Jul 2022 - Nov 2022**

- Service Infrastructure Development: Developed scalable backend services using Node.js and TypeScript, focusing on enhancing core application performance by 20%. I collaborated closely with senior developers to integrate new backend features, ensuring a 100% success rate during initial deployment phases.
- Data Retrieval Optimization: Optimized complex database queries within SQL and MongoDB environments, which reduced data retrieval times by 30%. These optimizations contributed to the successful delivery of three major projects and shortened overall project completion cycles by 15%

Skills

CORE COMPETENCIES: Backend Development, System Architecture, System Design, API Design, Database Optimization, Agile Methodologies, Team Mentoring, Cloud-Native Development, Distributed Systems, Cloud Computing
TECHNOLOGIES: Node.js, TypeScript, NestJS, Express.js, React, SQL, PostgreSQL, AWS, CI/CD, Java, Spring Boot, Python, Django, NoSQL, JavaScript

EDUCATION

Bachelor of Science, Biology **Jan 2013 - Jan 2019**

Ladoke Akintola University of Technology

Certification

- AWS Certified Cloud Practitioner - Certified: AWS Certified Solutions Architect – Associate

Languages

- English
