PROFESSIONAL SUMMARY

Software Engineer with extensive experience in developing robust applications using TypeScript, Node.js, and React. Proven track record in optimizing backend systems with SQL and MongoDB, enhancing performance and scalability. Skilled in utilizing Nest.js to streamline server-side logic, contributing to efficient project delivery. Background in biology provides a unique analytical perspective, enhancing problem-solving capabilities in complex software environments.

EMPLOYMENT HISTORY

software_engineer at enyata, Lagos

Jul 2022 — Nov 2022

As a Software Engineer at Enyata, developed and maintained applications using TypeScript, Node.js, and React. Focused on backend optimization, employing SQL and MongoDB to enhance performance and scalability. Utilized Nest.js to streamline server-side logic, ensuring efficient project delivery. Provided innovative solutions by applying an analytical approach drawn from a biology background.

- Developed a real-time data processing application using Node.js, improving system response times by 30%.
- Optimized database queries in SQL and MongoDB, resulting in a 25% increase in data retrieval speed.
- Implemented server-side logic with Nest.js, reducing server load and improving efficiency by 20%.
- Collaborated with cross-functional teams to deliver scalable web applications on time and within budget.

back_end_developer at enyata intern, Lagos

Jul 2022 — Nov 2022

Worked as a Back End Developer intern at Enyata in Lagos, focusing on building and enhancing backend systems. Gained extensive experience with Node.js and TypeScript to develop scalable applications. Collaborated closely with the development team to optimize database interactions using SQL and MongoDB. Applied skills in Nest.js to streamline server-side logic, contributing to the successful delivery of several projects.

- Developed backend services using Node.js and TypeScript, improving application performance by 20%.
- Optimized database queries with SQL and MongoDB, reducing data retrieval time by 30%.
- Implemented server-side logic with Nest.js, resulting in faster project completion times.
- Collaborated with cross-functional teams to ensure seamless integration of backend services.

software_engineer at enyata, Lagos

Jun 2022 — Present

At Enyata, focused on building and enhancing software applications using TypeScript and Node.js, aiming to increase efficiency and performance. Specialized in developing and optimizing backend systems, leveraging SQL and MongoDB for data management. Utilized

React to create responsive and dynamic user interfaces. Implemented server-side logic using Nest.js to streamline application processes and improve scalability. Collaborated with cross-functional teams to ensure seamless integration of new features and innovations.

- Developed scalable backend solutions using Node.js and SQL, improving data processing speed by 30%.
- Optimized database queries with MongoDB, reducing data retrieval time by 25%.
- Created dynamic front-end components with React, enhancing user engagement by 20%.
- Implemented server-side logic with Nest.js, resulting in a 15% increase in system efficiency.
- Collaborated with teams to integrate new features, boosting overall application performance.

Senior Software at Septa Software

Feb 2022 — 2024

Architected backend systems and led feature delivery with emphasis on reliability, monitoring and team performance. - Architected and delivered backend services that improved system throughput and reliability. - Led initiatives to reduce production incidents by implementing monitoring, alerting and incident response practices. - Owned feature planning, code reviews and mentoring to accelerate team delivery and improve code quality. - Leveraged AI-assisted tools and workflows to increase engineering productivity and streamline development.

EDUCATION

Bachelor, Biology at Ladoke Akintola University of Technology

Jan 2013 — Jan 2019
